Kakinada Institute of Engineering and Technology-II (JNTUK)

2022 - 2026

B.Tech Computer Science & Engineering (Cybersecurity)

CGPA: 7.65/10

Skills

Cybersecurity: Threat Detection, Network Security, VAPT, Web Security

Tools: Kali Linux, Nmap, Wireshark, Burp Suite, Git

Programming: Python, HTML, CSS, React.js, Tailwind CSS

Operating Systems: Linux, Windows

Work Experience

Cybersecurity Trainee

May 2024 - May 2026

CYBER CREW | Korangi, Kakinada

- Conducted authorized security assessments on web applications as part of club activities.
- Identified and responsibly reported an FTP-related security vulnerability on the college website.
- Discovered and documented an Information Disclosure vulnerability, assisting in improving the application's security posture.

Projects

Phishing Email Detector

Developed a phishing email detection system using Python, Flask and Machine Learning to classify phishing/spam emails and improve email security.

Secure Chat Application

Contributed to testing, authentication validation, bug reporting and secure communication analysis in a team-based secure messaging application.

Subdomain Finder

Built a reconnaissance tool for discovering subdomains to support security assessments.

Certifications

Fortinet Certified Network Associate
